GOAL

To work in a funny and interesting environment where I can learn from others and others can learn from me.

WORK EXPERIENCE

Wuaki.tv 2012–Present Senior QA Engineer, WUAKI.TV — Barcelona

VOD service on-line available in multiple devices. As a QA Engineer I'm in charge of developing and maintaining the automated test suite built with RSpec and Capybara for the Web Site and in Jassmine for the TV devices. One of our main goals has been to improve the execution time of our test suite by reducing it almost a 30% . Other tasks our dept. has done is to improve and increase the release frequency (from once per month to twice per week) through the usage of different environments where to test the isolated feature, without the concerns of an integration environment, in that way we can ensure the value of the feature and let the integration tests do their job.
<https://es.wuaki.tv>

Kinamik Data Integrity S.L 2011–2012 QA Engineer, KINAMIK DATA INTEGRITY S.L — Barcelona

Working as a QA Engineer and a 3/4 Tier Support Engineer. Designing and Maintaining Test Plans/Suites, executing these test plans and providing support to our customers. Worked with Java and JBoss, and HSM technologies as well.

Avery Berkel Spain 2010 – 2011 Technical Manager, AVERY BERKEL ESP — Barcelona

Leading the technical team for Spain and Portugal. I've worked for almost 6 months in Birmingham, where the company HQ were placed, providing support and developing integration projects with our customers.
<http://www.averyberkel.com/>

ThinkSmart S.L 2009 – 2010 Post-Sales Agent, THINKSMART S.L — Barcelona

Developing the Post-sales department for Samsung in the area of Catalonia, dealing with customer issues and scheduling delivering and fixing dates.
<http://www.thinksmart.es/>

Krontime S.L 2007 – 2009 Support Services Agent, KRONTIME S.L — Barcelona

Providing 1st and 2nd level support to customers and performing the on-site or remote installations of our products. Worked with VB6, HTML and JavaScript.
